

3-D Laserscanning Anti Glare Spray

To achieve optimal test results with 3-D Laser Scanning it is often necessary to apply an antireflection coating. Our 3-D Laserscanning Anti-Glare Spray and 3-D Laserscanning Cleaner are especially designed for this purpose. Due to its fine-grained structure it is possible to apply evenly layers of minimal thickness. The 3-D Anti-Glare Spray is the right product to meet the required accuracy of laser technology.

Test it!

Operation: Before measuring clean the surface with 3-D Laserscanning Cleaner. Shake Anti-Glare aerosol can well before use. Spray a thin layer onto the surface at approx. 20 cm distance. The Anti-Glare Spray is easily removable by using the 3-D Cleaner.

3-D Anti-Glare Spray:
Art. No. 119.990.001
PU: 12 aerosol cans/box

3-D Cleaner:
Art. No. 119.990.002
PU: 12 aerosol cans/box
