**DECORATIUNI DIN
POLISTIREN 2011**

FOR DESIGN este sursa ta de ornamente arhitecturale care te ajuta sa-ti transformi proiectul de constructie și sa-ti crezi un design exterior si interior impresionant si unic, folosind profilele noastre decorative din polistiren destinate decorarii fatadelor cladirilor pana la coloanele decorative, baghetele sau scafele ornamentale. Ele vin sa accentueze într-un stil elegant, modern sau aristocratic, interiorul sau exteriorul locuintei dumneavoastra.

FOR DESIGN produce pentru domeniul constructiilor si amenajarilor interioare o gama foarte variata de profile decorative din polistiren de orice forma si dimensiune, folosind un sistem computerizat de mare precizie care permite modelarea polistirenului expandat de inalta densitate (EPS 100, EPS 200), polistiren extrudat (XPS) obtinand astfel cele mai variate forme pentru ancadramentele usilor si ferestrelor, solbancuri si socluri, chei de bolta, medalioane, brauri decorative sau cornise, obloane false sau balustrii si beneficiind de multe alte avantaje evidente ale acestui material.

Profilul de polistiren este rezistent, usor si simplu de instalat datorita flexibilitatii prin care se poate monta. Profilele de polistiren se pot monta cu usurinta inclusiv pe suporturi curbate sau denivelate.

Prin acoperirea noastra cu un strat polimeric cuartos, profilul de polistiren devine dur si rezistent la impact, intemperii si raze UV. Costurile reduse si timpul de executie sunt doar cateva din avantajele utilizarii profilelor ornamentale decorative.

Cuprins

1. Chei de bolta		11. Capete zid	
2. Medalioane		12. Semnalistica	
3. Ancadramente		13. Scafe	
4. Cornise		14. Capiteluri	
5. Brauri		15. Suporti, console	
6. Coltare		16. Capete de stalp	
7. Solbancuri		17. Izolatori tevi	
8. Coloane		18. Baghete de interior	
9. Obloane false		19. Litere volumetrice	
10. Balustri		20. Ornamente de sarbatori	

CHEI DE BOLTA

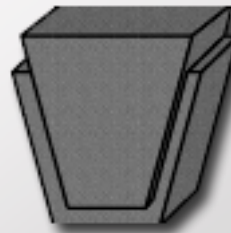

Elemente arhitecturale pentru ornarea partii superioare a ferestrelor.

FDCH-001

FDCH-002

MEDALIOANE

Elemente arhitecturale pentru ornarea peretilor.

FDM-001

FDM-002

IZOLATORI TEVI

Elemente folosite pentru izolarea tevilor de orice dimensiuni, montarea realizandu-se prin clipsare.

FDT-001

ANCADRAMENTE

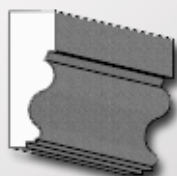

Elemente arhitecturale pentru incadrare usilor si ferestrelor intr-un chenar decorativ in relief care le inconjoara.

FDA-001

FDC-006

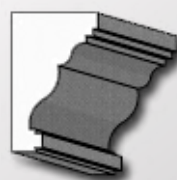

FDC-007

FDC-008

FDC-009

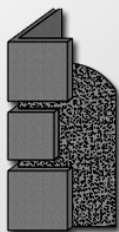

COLTARE

Elemente arhitecturale pentru ornarea colturilor exterioare a doi pereti

FDCT-001

FDCT-002

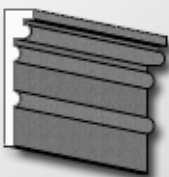

BRAURI

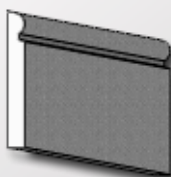

Elemente arhitecturale ce inconjoara o cladire sau sunt folosite pentru delimitarea etajelor.

FDB-001

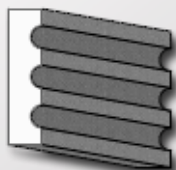

FDB-002

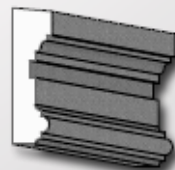

FDB-003

FDB-004

FDB-005

SOLBANCURI

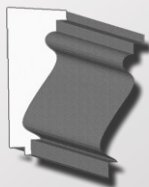

Elemente arhitecturale pentru protejarea parapetilor de sub ferestre de scurgerea apei de ploaie.

FDS-001

FDS-002

FDS-003

FDS-004

FDS-005

FDS-0XX

COLOANE

Elemente arhitecturale pentru ornarea stalpilor sau incadrarea usilor.

FDCL-001

FDCL-002

Tipuri de coloane:

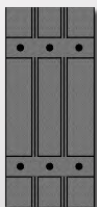

Intregi decupate in interior,
intregi, 3/4, 1/2, diverse forme

OBLOANE FALSE

Elemente arhitecturale pentru ornarea ferestrelor.

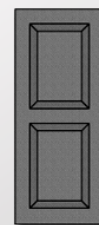

FDO-001

FDO-002

FDO-003

CAPETE DE ZID

Elemente arhitecturale aflate in partea superioara a zidurilor sau a gardurilor.

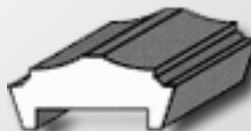

FDCPT-001

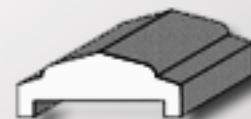

FDCPT-002

FDCPT-003

FDCPT-004

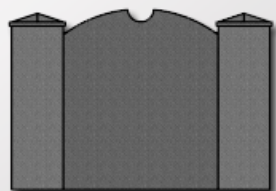

SEMNALISTICA

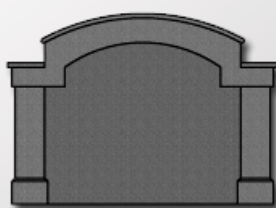

Elemente arhitecturale pentru semnalizare parcuri, localitati, institutii, monumente, etc.

FDM-001

FDM-002

FDM-003

SCAFE

Elemente interioare ce pot fi iluminate. Se folosesc , in special la tavane pentru a ascunde corpurile de iluminat.

FDSCF-001

BALUSTRI

Elemente arhitecturale pentru ornarea balcoanelor, crearea de balcoane false.

FDB-001

FDB-002

FDB-003

CAPITEL

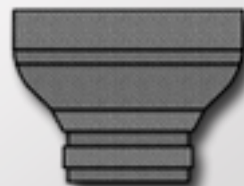

Elemente arhitecturale aflate in partea superioara si inferioara a coloanelor.

FDSP-001

FDSP-002

FDSP-003

Litere volumetrice, sigle, numere de casa, etc.

Litere
Volumetrice

4d

Sigle

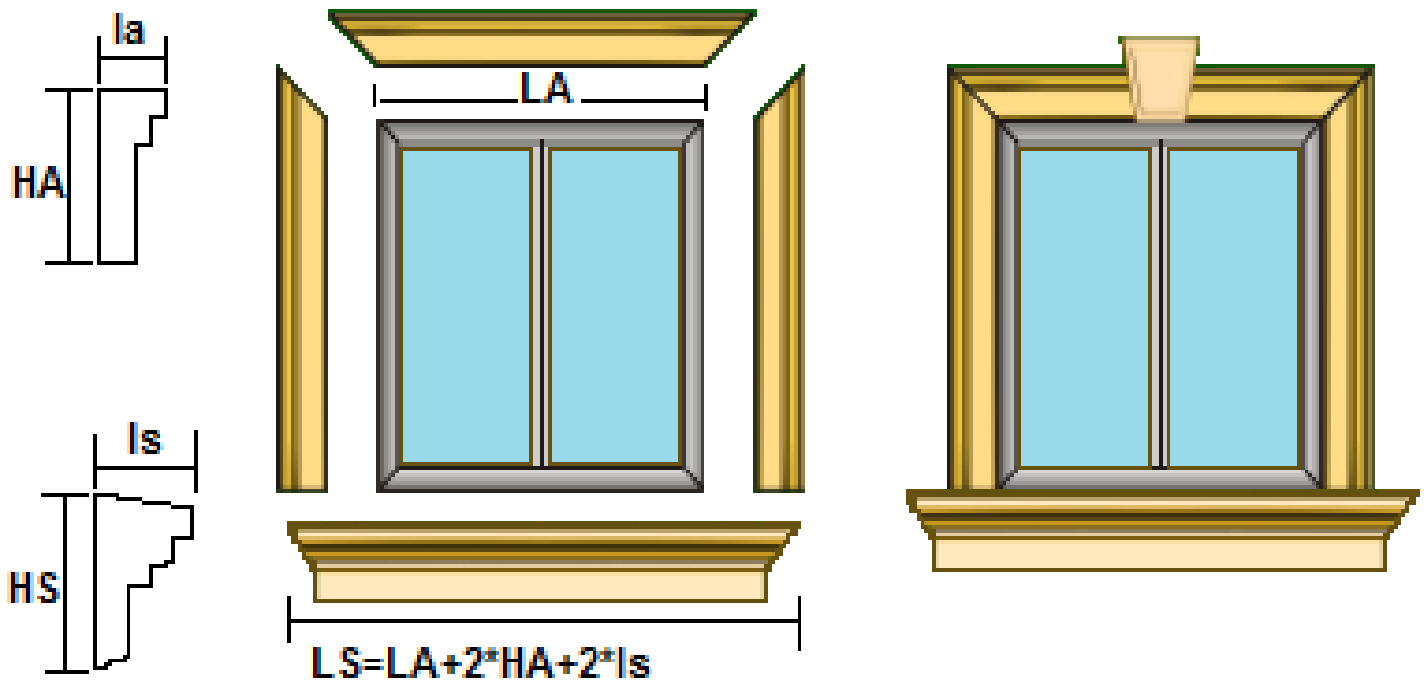

Numere de
casa

Elemente decorative
pentru sarbatori sau ocazii speciale, orice dimensiune.

Ghid de instalare a profilelor FOR DESIGN

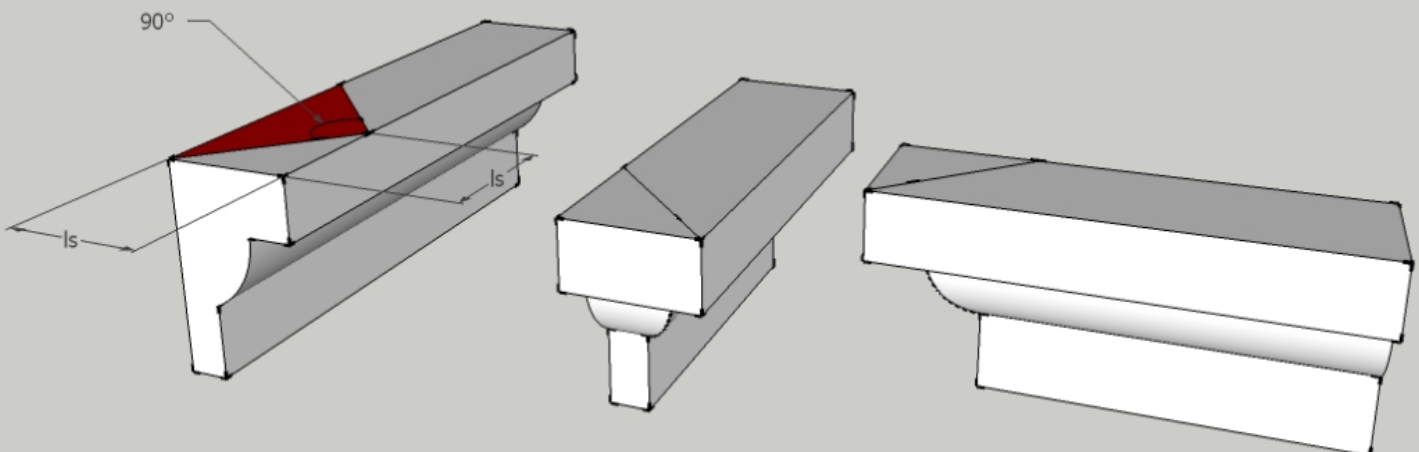

Instalarea se va face la o temperatura ambianta de minim 5 grade, cu adezivi specifici polistirenului expandat pe suprafete curate fara urme de grasimi sau alte substante.

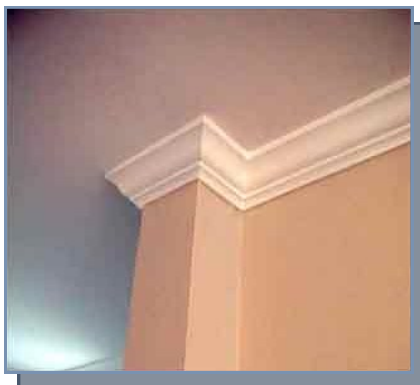

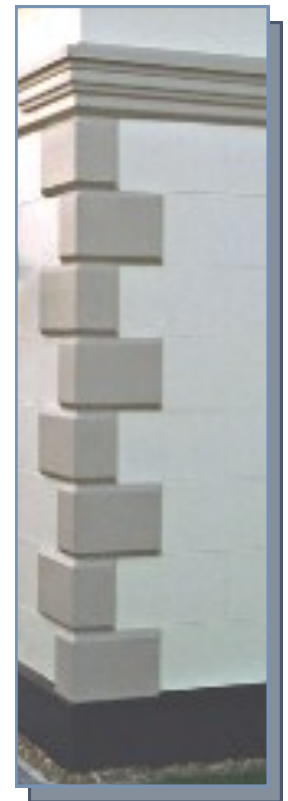

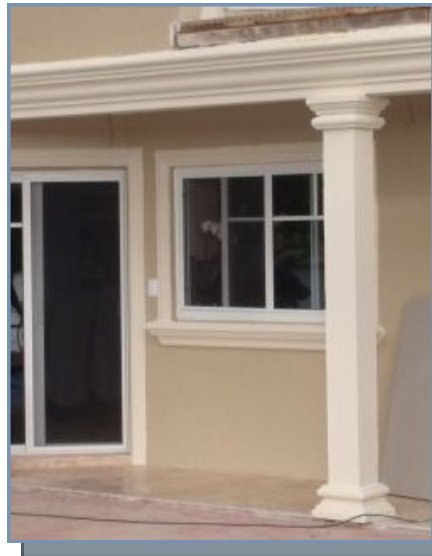

Aplicarea se face conform figurilor alaturate incepand cu montarea pervazelor la ferestre, sau a colturilor la cornise.

Pana la uscarea adezivilor se recomanda fixarea mecanica cu ajutorul unor cuie sau suruburi, urmand ca mai tarziu acestea sa fie inlaturate iar urmele lasate de acestea sa fie chituite.

Indepartati surplusul de adeziv inainte de uscarea acestuia.

Dupa instalare acestea nu necesita amorsare sau alte operatii inainte de vopsire cu orice vopsea lavabila de exterior.
